Research Interests

HA Macroeconomics; Macro-Finance

Education

ESSEC Business School - CY Cergy Paris University — Cergy, France
Research Master with Full Scholarships, Mention Très Bien (17/20) — *Sept 2025 – Present*

Paris School of Economics — Paris, France
Master Analysis and Policy in Economics (APE), Mention Bien (15.5/20) — *Sept 2022 – June 2024*

University Paris 1 Pantheon-Sorbonne — Paris, France
M1 in Mathematical Methods in Economics and Finance, Mention Très Bien (4/4) — *Sept 2021 – June 2022*

Zhongnan University of Economics and Law — Wuhan, China
B.A. in Economics, Magna Cum Laude (3.67/4.00) — *Sept 2017 – June 2021*

Skills

Languages: Python, R, Stata, Julia, Matlab, Stata, LaTex; Chinese (native), English (advanced), French (basic)

Academic Experience

University of Paris Dauphine - LEDa — Paris, France
Predoc for Prof. Gianluca Orefice — *Oct 2024 – Apr 2025*

- **Project:** Globalization and Workforce Composition
- **Dataset & Skills:** Eurostat, INSEE, CEPII Gravity & Baci; STATA, LaTeX, Webscraping

Paris School of Economics — Paris, France
RA for Prof. Ariell Reshef — *Feb 2024 – Sept 2024*

- **Project One:** When Yona Met Yeaple: Exports versus FDI with Extensive Margins
- **Project Two:** Migration and Cultural Change
- **Dataset & Skills:** World Bank Doing Business, UN Migration, CEPII Gravity & Baci, World Value Survey, Gallup World Poll; STATA, LaTeX

CNRS - Centre national de la recherche scientifique — Paris, France
RA for Clement Bosquet — *May 2023 – Sept 2023*

- **Project:** Gender Gaps, Geography and the Marriage Market
- **Dataset & Skills:** IPUMS, PSID; STATA

Work in Progress

Flight to Quality: A Two-Bank Economy with Senior Claims
Thesis One — *ESSEC–CY, 2026*

- Build a two-bank general-equilibrium model with heterogeneous Value-at-Risk constraints and a senior interbank claim, showing that seniority reroutes default risk to the deposit-insurance backstop and keeps the interbank-contagion channel dormant in equilibrium.

Accounting for Tastes of Third-Country Immigrants
Thesis Two — *Paris School of Economics, 2024*

- Extend the Armington structural gravity model with a cultural-composition measure of "third-country" immigrants to separately identify the preference and information channels of the migration–trade nexus, finding that culturally proximate immigrant compositions significantly raise host-country imports of culturally sensitive goods.

Other Academic Activities

Tools for Macroeconomics August 2026
Macro, Money, and Finance Summer School, Princeton University July 2026
